

Section 16 Reporting

Bridgeway designed INSIDERdirect as the first Web-based solution for completing, routing, and filing Forms 3, 4, and 5 with the SEC. INSIDERdirect is a centralized, hosted, Web application that issuers and insiders can share to complete Section 16 filings quickly and easily via a standard Web-browser with access to the Internet.

Secure access to the INSIDERdirect system begins by issuing an account, user ID, and password to each registered user. Users can log on to the INSIDERdirect site anytime, anywhere via a standard Web-browser and electronically file documents with the SEC within the two-business day requirement of the Sarbanes-Oxley Act.

INSIDERdirect – Proven Results

INSIDERdirect is built for busy people who need an easy system that lets them:

- Complete, route for review, and EDGARize forms by directly typing in the information or by copying the portfolio holdings from the insider's previous filing
- Examine a draft filing, comment on it, and approve it online
- Build a list of reviewers who will be notified via e-mail that a filing has been created that requires immediate review
- Be assured of the highest security available for Internet communication
- Submit live and test section 16 filings to EDGAR with realtime status
- Receive convenient assistance every step of the way from ample help menus built within the program

INSIDERdirect is also law firm-enabled with specific provisions to let a firm manage multiple issuers throughout the system.
