Bridgeway Brings Electronic Discovery In-House *Technology Partnerships Provide "End-to-End" Workflow*

(August 12, 2008 -- Houston, TX) Bridgeway Software announced that it has developed a comprehensive electronic discovery solution for in-house legal departments that supports key processes within the electronic discovery workflow - Preservation, Collection, Processing, Review, and Production. Bridgeway E-Discovery assures a repeatable process by design, providing one layer for end-to-end electronic discovery and empowering in-house counsel to demonstrate compliance and control costs.

Bridgeway's proprietary Legal Hold solution supports the notification and preservation process. Bridgeway has established partnership agreements with StoredIQ, IPRO Tech and Anacomp for the other key processes that drive electronic discovery.

Bridgeway's Vice President of E-Discovery, Rich Hall, explains, "In selecting technology partners for our end-to-end e-discovery solution, Bridgeway focused heavily on track records of customer service, corporate culture and product quality. The way in which prospective partners interacted with Bridgeway indicated how we could expect them to treat our clients. The selected providers invested time to understand Bridgeway's vision and dedicated resources to ensure that Bridgeway's vision aligns with their goals."

For the Identification, Preservation and Collection phase of the solution, Bridgeway sought StoredIQ's award-winning information management product that has a sophisticated feature set and provides defensible "Chain of Custody" for legal matters. StoredIQ uses leading-edge technology to identify and harvest potentially relevant information and to place that information under legal hold. In less than one hour, the StoredIQ appliance can be deployed and begin generating results.

James Schellhase, CEO of StoredIQ comments, "We are a true champion of the end-to-end electronic discovery process, and we are pleased to provide technology to support it. The StoredIQ appliance fits Bridgeway's overarching goal of providing clients with solutions that help them meet their compliance and e-discovery requirements."

Processing and production are challenging steps in the e-discovery life cycle of data. Bridgeway required a proven product that generates consistent results. Hall says, "IPRO Tech's eCapture™ fits that description. This is a highly scalable product with a proven track record and is well known throughout the industry."

"eCapture is a natural fit to join the Bridgeway Suite," according to Jim King, CEO of IPRO Tech. "Standardized processes and solid integration ensure repeatable, quantifiable results. Reliability and performance is what eCapture is all about."

Anacomp's CaseLogistix supports the review phase. According to Hall, "Bridgeway wanted a litigation review platform that is highly scalable with a robust toolset capable of handling the most challenging of e-discovery reviews. In addition, the tool must be intuitive enough for attorneys to learn and use very quickly."

"We're pleased that after conducting its thorough evaluation of leading litigation review solutions on the market, Bridgeway determined CaseLogistix to be the most robust, scalable and intuitive review platform for its e-discovery offering," said Howard Dratler, CEO of Anacomp. "Enabling legal teams to quickly organize, review, analyze and produce digital evidence are crucial steps within the overall e-discovery process. This integration will benefit corporate counsel customers by delivering greater value, addressing complex litigation challenges and offering a more complete, end-to-end approach to their e-discovery needs."

In-house legal departments currently manage electronic discovery through a collection of disparate software applications offered by distinctly separate vendors. Bridgeway E-Discovery is a subscription-based product providing electronic discovery as a single solution from a single provider.

Bridgeway President Keith Okano adds, "Based on persistent requests from our clients, Bridgeway investigated the challenges presented by electronic discovery. Through that research, we identified a methodology for teaming best practices with a repeatable end-to-end process. Bridgeway E-Discovery is the only solution designed with a complete set of tools, processes, and supplemental staffing to bring electronic discovery in-house – from preservation to production. These products will be put to the test by a consortium of companies that will execute real-life scenarios."

Okano concludes, "This solution reflects Bridgeway's commitment to provide the technology infrastructure for all legal business administration. Our integrated and comprehensive approach helps organizations meet complex legal, compliance and business challenges."

About Bridgeway

Bridgeway is dedicated to providing software solutions and professional services to implement best practices for the offices of the general counsel and corporate secretary. Leading corporations and government agencies rely on Bridgeway's integrated technology approach to optimize productivity and reduce risk. Bridgeway implements systems in the areas of electronic discovery, corporate governance, case and matter management, cost management, contract management, litigation risk assessment and electronic invoicing. Founded in 1989, the company is headquartered in Houston, Texas with representative offices in Philadelphia and Toronto. More information about Bridgeway E-Discovery, Legal Hold, eCounsel[®], LawManager[®], Secretariat[®], Corridor[™] and Predix[™] is available at www.bridge-way.com or by calling 888-272-4699.
